

# Rotao24

High efficiency and elegant appearance

Building on the success of our Rundo24 luminaire, we've developed the new Rotao24, which takes the advanced edgelighting technology of its predecessor and transforms it into an elegant ring-shaped design. Available in a range of diameters, Rotao24 seamlessly fits into various social and commercial spaces, while also adding a touch of sophistication to living rooms or meeting rooms.

Featuring a sleek aluminium profile with a height of just 24 mm, Rotao24 delivers exceptional efficacy of up to 145 lm/W, bringing a sense of lightness and elegance to any space. The luminaire is available as a suspended or surface-mounted version, with either direct or direct-indirect light distribution that creates a captivating halo effect. Whether you opt for the PMMA opal diffuser or the microprismatic optical system, Rotao24 is a versatile choice for both commercial environments and residential interiors.

For those who seek a playful twist, combining different diameters creates a striking visual effect. Additionally, Rotao24 can be equipped with modern features like motion sensors, daylight sensors, Tunable white or Bluetooth technology, allowing you to effortlessly control the luminaire via your smart device. From offices to homes, Rotao24 redefines lighting with innovation and style.
